

QUALITY EQUIPMENT AND INFORMATION FOR CANI-CROSS, BIKEJOR, SKIJOR AND MUSHING

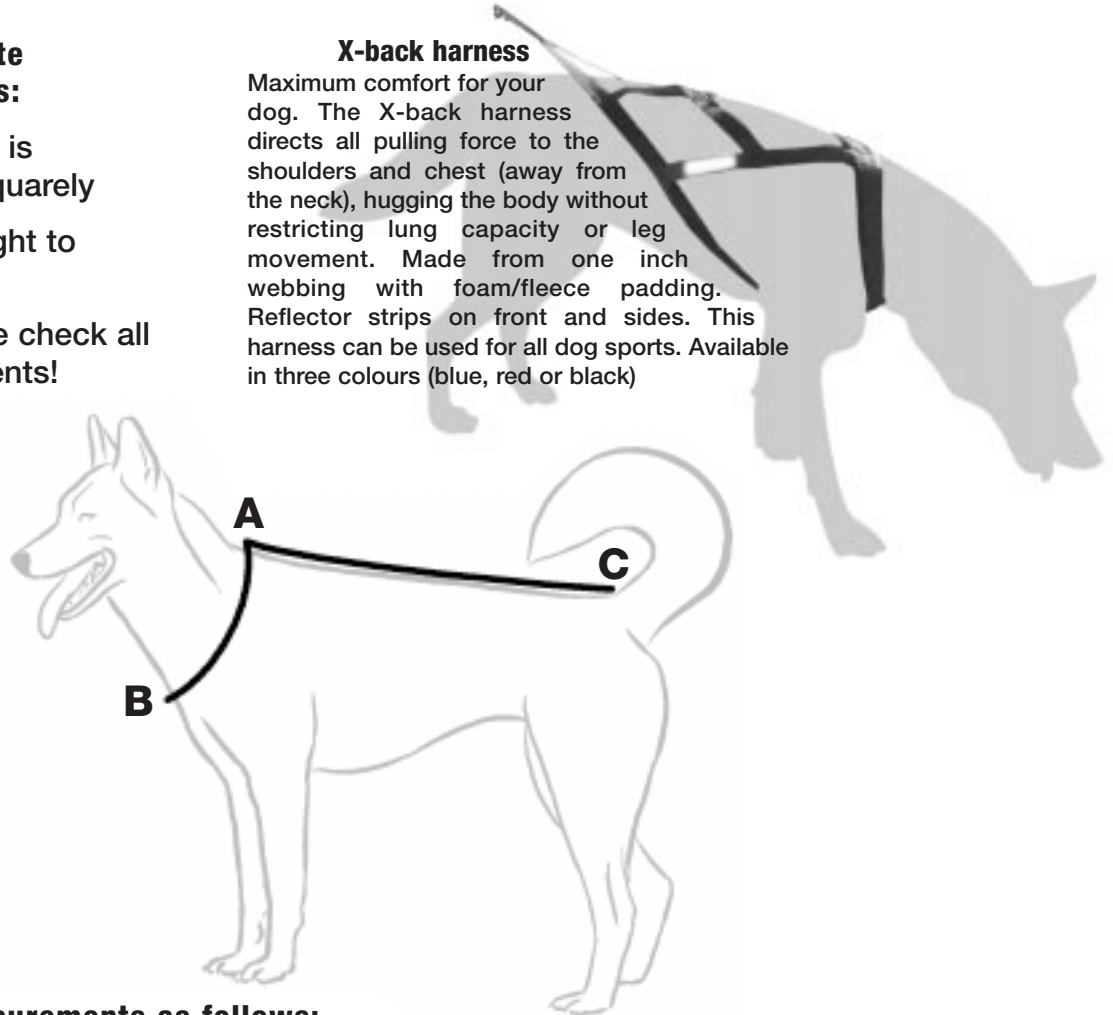

MEASURING YOUR DOG FOR A RUNNING HARNESS

To get accurate measurements:

- ensure dog is standing squarely
- pull tape tight to fit snugly
- then double check all measurements!

X-back harness

Maximum comfort for your dog. The X-back harness directs all pulling force to the shoulders and chest (away from the neck), hugging the body without restricting lung capacity or leg movement. Made from one inch webbing with foam/fleece padding. Reflector strips on front and sides. This harness can be used for all dog sports. Available in three colours (blue, red or black)

We need measurements as follows:

1 **Neck** – ‘A’ base of neck (above shoulder blades) to ‘B’ top point of breast bone and back to ‘A’.

2 **Length** – ‘A’ base of neck (above shoulder blades) to ‘C’ base of tail.

3 Breed

4 Age

5 Weight

6 Type of fur

If you have any questions on the above, please telephone or email. We are also happy to ‘walk you through’ while you are measuring your dog over the phone.
